Hey, thanks for helping me out. I'm just doing a quick survey on how people use AI and whether we can actually trust what it says. Is it okay if I record this? Yeah sure, go on.

Okay, what do you usually use AI for in your daily life or for your studies? I myself use AI for studying, you know like understanding concepts and solving problems. Sometimes I also use AI to get ideas for my assignments and for some random questions when I, you know, brainstorm my ideas and all that. Okay, when it gives you an answer, do you usually trust it or do you feel like you have to double check everything? I don't fully trust it.

I mean, if it's something important like my exam topic or my, you know, assignment which contains a lot of marks, I usually double check it. It's not because I don't trust it completely but there's a small chance that AI could be wrong, so that's why. Has an AI ever told you something totally wrong but acted like it was 100% correct? Yeah, definitely.

It happened to me so many times, like especially with numerical stuff like with math or something like math. I mean, it acts like it gave the perfect answer but when I check it with other sources, the answer is wrong and, you know, when I verify the answers on my own, it feels like, okay, this is wrong. But the AI was still so confident, so I was doubting myself.

Okay, does AI ever make you doubt yourself like you know the answer but AI was also so confident that you started to think you were the one who was wrong? Yes, sometimes, you know, when AI explains something in a very confident way, it makes me rethink that, okay, I might be wrong. But, you know, I realized that AI can be wrong too, so now I trust myself more than that. Okay, do you think relying on AI is making it harder for us to think for ourselves or is it just a better way to learn? I think it goes in both ways, like it definitely makes learning faster and easier but if we rely too much on it, we might stop thinking deeply and understanding, you know, we might stop understanding concepts very deeply and it depends on how we use it.

Okay, thank you. Thank you for help. Yeah, sure.
